Task Title:

Assignment 2

Task description:

Making a landing page for an event or launch event web page of topic of our choice.

Steps Taken:

Usage of HTML and CSS and some web-downloaded images to manually code and make responsive landing page, and software used for writing the code is vs code.

Challenges Faced:

A bit challenging to make the whole page according to the idea.

Solutions Implemented:

Firstly, used HTML and CSS to make the pages. Second used some web-downloaded images in the pages. Third actually making the web page responsive and trying a bit to make it look like a professional event landing page.

Learnings:

This is our second task and I had a lot of fun and learnt how to properly apply knowledge to do the creative work. Day by day, it is very interesting and feeling like actually working for a software company. Working on every single bit of it is expanding my knowledge and learning. Also learnt that exploring and trying new things is fun and interesting.

Project Update:

Hereby I can say that the project is complete.
